Message from the University of Arizona President

Dear Graduates,

Congratulations on this remarkable achievement. As you celebrate this milestone, I hope you feel the deep sense of pride the entire University of Arizona community shares for all you have accomplished during your years here. Your persistence, curiosity, and pursuit of academic excellence have truly defined your tenure as Wildcats.

Though your journeys here have been distinctly personal, together you have demonstrated the values that make our university distinctive: the curiosity that drives discovery, the community that sustains us, and the collaboration that amplifies our collective impact. By engaging in research, leadership, and new experiences, you have fostered a culture that enriches our lives and work.

The connections you have made and the resilience you have shown will serve as the foundation for what lies ahead. As you begin this next chapter, remember that you carry with you the spirit of what makes the University of Arizona a force for good. Our land-grant mission will guide you forward—and the world will be better for your commitment to making a lasting impact.

Your alma mater will always remain a part of your story and a lasting community that supports you. The University of Arizona will always be here to cheer for your success as you move forward into a bright future.

With all my best wishes,

Suresh Garimella

President

Message from the Arizona Board of Regents

Dear Graduate,

Congratulations on your graduation from the University of Arizona. Today marks a significant milestone in your life, one which opens doors to exciting, new opportunities.

You've all worked hard to earn your degree and are now prepared to make a difference in our world. The U of A has given you the skills, knowledge and innovative mindset to thrive in a society that is always changing.

Earning your degree gives you the opportunity to advance your skills, serve your country and engender positive change in society. As a graduate of the U of A, you carry forward the proud traditions of a university that has helped shape countless success stories.

As you go on to new adventures in life, please remember your alma mater — friends, mentors, professors and everyone who supported you throughout your college years. Stay connected to the university and remember you are forever part of the U of A community. We wish you the best for a future that is full of promise.

Go Wildcats!

The Tradition of Commencement

Commencement — from the ancient practice of beginning life’s work at the end of an apprenticeship — has roots eight centuries in the European past. The robes and caps worn by the faculty and graduating students at the University of Arizona follow the style of Oxford University.

The bachelor’s gown, of poplin or a similar cloth, has long, pointed sleeves; the master’s gown, also of poplin, has long, closed sleeves with square ends and a slit at the elbow for the arm to come through; the doctor’s gown has full, round, open sleeves, is faced with velvet, and has three velvet stripes on the sleeves.

The formality of the blue or black gowns is relieved by the bright spectrum of colors of hood or stole, and tassel indicating the wearer’s field of study. At the University of Arizona, candidates for the bachelor’s degree do not wear hoods, but the colors of their tassels indicate the fields in which they are receiving degrees. At the moment the degree is conferred, the new bachelors move the tassels from right to left to signify their changed academic status. The candidates for advanced degrees wear hoods lined with silk in the official red and blue colors of the University. The velvet edging of the hood bears the color of the candidate’s major field.

The official color for the Doctor of Philosophy degree (Ph.D.) is dark blue, regardless of the major field of study. Tassel colors used by advanced degree candidates are: master’s, black; doctoral, old gold.

The official degree colors established by the Intercollegiate Code in 1895 are used to represent the following major fields of learning at the University of Arizona:

Agriculture, Life and Environmental Sciences	Maize
Architecture, Planning and Landscape Architecture	Blue-Violet
Business and Public Administration	Drab (Tan)
Education	Light Blue
Engineering	Orange
Fine Arts	Dark Brown
Health Professions	Green
Human Ecology	Maroon
Humanities	White
Information Sciences	Lemon
Law	Purple
Medicine	Green
Music	Pink
Nursing	Apricot
Optical Sciences	Orange
Pharmacy	Olive
Public Health	Salmon
Science	Gold
Social and Behavioral Sciences	White
Veterinary Medicine	Silver

The University of Arizona Ceremonial Mace

The ceremonial — or academic — mace of the University of Arizona reflects the unique character, mission and values of this institution. At Commencement, it signifies the order and authority of the academic procession. The placing of the mace in its stand marks the beginning of the ceremony. Its removal signifies the end of the ceremony.

In medieval times, maces were used in combat. Later, bodyguards carried maces to protect royalty. By the 16th century, maces took on the elegance of silver, gold and precious stones, and were incorporated into academic and civil ceremonies. The symbol of authority for the city of London, for example, is the mace of the Lord Mayor.

The University of Arizona mace features a crown of sterling silver surrounding the seal of the university, which is accented with 22-karat gold. Underlying the crown are 24 acrylic strips in the school colors of red and blue, which add a jewel-like sparkle. The main shaft is made of local mesquite with a sterling silver band inscribed with The University of Arizona, accented with 22-karat gold. The tailpiece repeats the motif of the crown and surrounds a medallion with an image of a wildcat, the school mascot.

We thank the University of Arizona Foundation, the College of Fine Arts and Professor Emeritus Michael Croft for adding the gift of this mace to our Commencement traditions.

Commencement Speaker

Eric Schmidt

HONORARY DOCTOR OF SCIENCE
College of Science

Eric Schmidt, KBE, Chair and CEO of Relativity Space, is best known for his pivotal role in the growth of Google, where, as CEO and Chairman, he oversaw the company's transformation from a small startup to one of the world's most influential companies from 2001 to 2011. Under his leadership, alongside Sergey Brin and Larry Page, the company dramatically scaled its infrastructure and diversified its products, while maintaining a strong culture of innovation. From 2018-2020, Eric served as the Technical Advisor to Alphabet, the holding company of Google, advising its leaders on technology, business, and policy issues. He was also the Executive Chairman of Alphabet from 2015-2018 and remained as the Chairman of Google until 2015.

Prior to joining Google, Eric was Chairman and CEO of Novell, a software as a service company. He previously spent 14 years at Sun Microsystems, Inc., starting his career as a manager and rising to become their Chief Technology Officer. He also held technical positions at Xerox Palo Alto Research Center (PARC), Bell Laboratories, and Zilog.

Eric has been honored with numerous accolades and supports a variety of esteemed organizations. He was elected to the National Academy of Engineering in 2006 and inducted into the American Academy of Arts and Sciences as a fellow in 2007. He was on the Board

of Trustees at Carnegie Mellon University from 2004 to 2006, and at Princeton University from 2007 to 2010. Additionally, since 2008, he has served as a trustee of the Institute for Advanced Study in Princeton, New Jersey, and after a 12-year tenure was named an emeritus board member in 2020. Eric was also a member of the President's Council of Advisors on Science from 2009 to 2017. He currently serves as Chair of the Board of Trustees of The Broad Institute and is on the board of The Mayo Clinic, as well as Director of Science for America. Since 2022, Eric has served as the Chairman of the Board of Directors for Sandbox AQ. In 2023, he was an Institute of Global Politics Carnegie Distinguished Fellow within Columbia's School of International and Public Affairs. Notably, in 2024 Eric was awarded an honorary Knight of the Most Excellent Order of the British Empire by His Majesty King Charles III for services to Philanthropy.

Eric became the Chairman of the Department of Defense's Innovation Board in 2016 and held the position for four years, during which he was awarded the Department of Defense Medal for Distinguished Public Service in January 2017 by Secretary of Defense Ashton Carter. He was also a member of NASA's National Space Council User Advisory Group for two years which was chaired by the Vice President. He served as the Chairman of the US National Security Commission for Artificial Intelligence for three years. In 2021, he launched, and currently Chairs, the Special Competitive Studies Project, an initiative that makes recommendations to strengthen America's long-term global competitiveness for a future where artificial intelligence (AI) and other emerging technologies reshape our national security, economy, and society. Eric is also a commissioner on the National Security Commission on Emerging Biotechnology (NSCEB), which was tasked to review how advancements in

emerging biotechnology and related technologies will shape current and future activities of the Department of Defense. He's been a supportive contributor to MIT across various programs, and is a member of the CEO Advisory Board and the Schwarzman College of Computing Advisory Council.

An accomplished author, Eric has written four bestselling books. He wrote the first with Jared Cohen, earning a spot on the New York Times bestseller list with *The New Digital Age: Transforming Nations, Businesses, and Our Lives* in 2013. In 2014, Eric published his second New York Times bestseller, *How Google Works*, which he and Jonathan Rosenberg co-authored with Alan Eagle. In 2019, Eric published his third New York Times bestseller, *Trillion Dollar Coach: The Leadership Playbook of Silicon Valley's Bill Campbell*, co-authored with Jonathan Rosenberg and Alan Eagle. In 2021, Eric wrote the Wall Street Journal-best seller, *The Age of AI: And Our Human Future*, with Dr. Henry Kissinger and Professor Daniel Huttenlocher. His most recent New York Times bestselling book, titled *Genesis: Artificial Intelligence, Hope, and the Human Spirit* (2024), co-written with the late Dr. Henry Kissinger, and Craig Mundie, offers an accessible guide to how AI will shape civilization in the modern era.

Inspired to continue their legacy of giving back, Eric and his wife Wendy have founded several philanthropic organizations, including the Schmidt Family Foundation, Schmidt Ocean Institute, and Schmidt Futures. Most recently in 2024, they founded Schmidt Sciences, a nonprofit organization working to advance science and technology that deepens human understanding of the natural world and develops solutions to global issues.

Eric holds a bachelor's degree in electrical engineering from Princeton University and a master's degree and Ph.D. in computer science from the University of California, Berkeley.

Student Awards

Braelyn Huff

ROBIE MEDAL

Braelyn Huff is graduating summa cum laude with a Bachelor of Arts in economics and in politics, philosophy, economics, and law. Originally from Lancaster County, Pennsylvania, Braelyn is a first-generation college student whose experiences shaped her strong commitment to financial wellness and education. During high school, she managed a Subway restaurant full time to help save for college and set the goal of completing her degree in three years. The support and opportunities that made her college journey possible inspired her dedication to helping others navigate financial access and opportunity.

As a lead Take Charge Cat ambassador, Braelyn has delivered lessons on budgeting, credit management and investing to hundreds of middle and high school students. She has also contributed to financial literacy education on campus by assisting with workshops on taxes and financial wellness and helping develop new educational curricula for students and young adults. In her role as a college readiness associate with the Tucson Metropolitan Commission, Braelyn supported students across Arizona in completing the FAFSA, accessing scholarships, and understanding financial aid offers.

Braelyn also has made significant contributions to undergraduate research and scholarship. As editor-in-chief and a founding member of the Arizona Undergraduate

Law Review, she helped create a platform for undergraduates to explore and debate complex legal topics and theories. In December, she published her own article, "Double Moral Hazard and the Student Loan Crisis." She also worked as a research assistant to Saura Masconale, analyzing the causes of rising executive pay and the worker-CEO wage gap, with a focus on the economic implications of transparency as a legal remedy. In her honors thesis, Braelyn examined the law and economics of menstrual product taxation and the role of policy in addressing period poverty.

Braelyn's scholarships include the Gerald J. Swanson Endowed Scholarship for Excellence in Economics, the College of Social and Behavioral Sciences Innovative Circle Scholarship, the Kirk and Yvette Drummond Scholarship, and the Corson Family Endowed Scholarship.

After graduation, Braelyn plans to pursue a joint economics doctoral degree and Juris Doctor. She is particularly interested in questions surrounding the efficiency and equity of corporate law, labor rights, and the development of human capital. Braelyn hopes to become a professor and contribute research that advances economic opportunity while fostering curiosity and critical thinking in future generations.

Gabriel Trinidad

ROBIE MEDAL

Gabriel Trinidad is a senior majoring in physiology and medical sciences with a double minor in

Spanish and biochemistry. Born and raised on Tucson's west side, he is a first-generation college student whose experiences have shaped his commitment to health equity and community service.

Gabriel's connection to the University of Arizona is deeply rooted in his lifelong ties to the Tucson community. His desire to serve underserved populations has guided his academic, professional, and service-oriented pursuits.

On campus, Gabriel has contributed meaningfully through mentorship, teaching, and research. As a two-semester preceptor for PSIO 202, he supported students in mastering challenging physiology concepts while fostering confidence and belonging in the classroom.

His dedication to community-engaged research is reflected in his work with Nosotros Comprometidos a Su Salud in the Mel and Enid Zuckerman College of Public Health. There, he conducts FibroScan assessments and contributes to research on hepatic steatosis and liver fibrosis in Hispanic communities, deepening his understanding of health disparities and culturally informed care.

Beyond campus, Gabriel has spent nearly four years as a medical assistant at El Rio Community Health Center, providing compassionate care across Family Medicine, Pediatrics, Weight Management, and Teen Clinic. He has helped develop clinical workflows and training protocols for clinical testing and patient communication, supporting nurses and fellow medical assistants in delivering efficient, high-quality care. In collaboration with El Rio, Nosotros, and Arizona Liver Health, he helped launch an initiative to bring liver FibroScan screenings directly into El Rio clinics, expanding access to early detection for patients facing

Student Awards

barriers to specialty care.

Gabriel's leadership was further recognized through his selection for the 2025-2026 El Rio Leadership Development Fellowship, a nine-month program focused on cultivating skills in communication, emotional intelligence, and systems-level thinking. His academic excellence has earned him recognition as a multi-semester Dean's List with Distinction honoree.

After graduation, Gabriel plans to take a gap year to continue working at El Rio, remain involved in liver-health research, and prepare for medical school. His long-term goal is to become a primary care physician specializing in addiction medicine, providing compassionate, culturally informed care to underserved communities throughout Tucson.

Alicia Salazar Contreras
NUGENT AWARD

Alicia Salazar Contreras is graduating with dual degrees in speech, language, and hearing sciences and Spanish from the University of Arizona. A first-generation Hispanic student born and raised in Tucson, Alicia has witnessed firsthand the gaps in resources available to Spanish-speaking communities, particularly for individuals in need of speech and language services. These experiences inspired her commitment to advocating for her community and working to expand research and clinical representation

for Spanish-speaking populations in the United States.

During her time as an undergraduate, Alicia participated in research as both a McNair and FUERZA Scholar. Through this work, she helped develop *Sopa de Pescado*, a Spanish-language reading passage designed to support the differential diagnosis of motor speech disorders. Created with Spanish speakers in the U.S.-Mexico borderlands in mind, the passage aims to encourage more culturally and linguistically responsive clinical practices.

Beyond research, Alicia has demonstrated a strong commitment to service. She served as an interpreting lead team member for ARSOBO, a humanitarian aid organization based in Nogales, Sonora, Mexico, that provides free monthly audiological services to individuals in need. She also completed a year-long internship with the Tucson Unified School District, where she assisted a bilingual speech-language pathologist in providing services for bilingual children throughout the Tucson area.

After graduation, Alicia plans to pursue a master's degree in speech-language pathology and become a clinically certified bilingual speech-language pathologist. Her goal is to support and advocate for underserved Spanish-English bilingual communities in Tucson by providing culturally responsive speech and language services.

Lane Vazquez Luna
NUGENT AWARD

Lane Vazquez Luna is graduating with a Bachelor of Science in biochemistry with a minor in classics. A Hispanic first-generation college student from El Mirage, Arizona, Lane found a home in Tucson, where he developed a deep commitment to service, inclusion, and mentorship at the University of Arizona.

Early in his undergraduate career, Lane immersed himself in service opportunities across campus and Tucson. Through the university's pre-health club MexZona, he volunteered at a community clinic where he provided translation support to Spanish-speaking patients. This experience sparked his passion for patient care and strengthened his commitment to serving underrepresented communities. He also volunteered with the Campus Pantry to address food insecurity, and with Campus Health's Stressbusters program, promoting mental health and helping reduce stress among college students.

Lane's academic interests led him to become a preceptor for a biochemical laboratory techniques course under the mentorship of Dr. Juliana Sacoman. In this role, he helped guide aspiring biochemists through foundational laboratory methods and supported multiple cohorts of students as they developed skills essential for research and scientific careers.

Student Awards

After completing the course and developing a strong interest in protein chemistry, Lane joined the McKay Laboratory in the College of Medicine – Tucson's Department of Ophthalmology and Vision Sciences. There, he conducted independent research on protein interactions related to glaucoma, with the goal of identifying potential drug targets and diagnostic tools. Under the mentorship of Dr. Brian McKay, Lane presented his research at local and international conferences.

Mentorship has played a defining role in Lane's journey, inspiring him to support others in the same way he was supported. He served as a mentor to incoming chemistry and biochemistry students, helping them navigate their transition to the university. He also mentored fellow scholars within his scholarship program, connecting students with resources and opportunities.

Lane is a recipient of the Dorrance Scholarship, which supports first-generation college students and provides opportunities for global experiences and enrichment in the humanities. Through the university's Eye Care Initiative Club, he also participated in Western University of Health Sciences' Summer Health Professions Education Program, where he explored health disparities and health policy in optometry.

After graduation, Lane plans to pursue a professional degree in optometry. He hopes to combine his interests in science, service, and policy to advocate for underserved communities and promote more equitable access to health care.

Imon Contractor
FREEMAN MEDAL

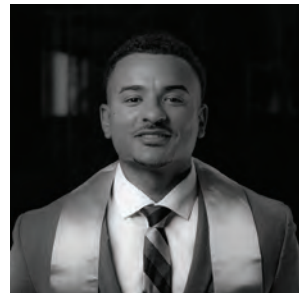

Imon Contractor is an Army veteran and honors student at the Eller College of Management, where she is pursuing a Bachelor of Science in operations and supply chain management. She has been recognized as the Eller Scholar of the Year and serves in multiple leadership roles focused on strengthening student community and engagement.

Before enrolling at the University of Arizona, Imon attended the United States Military Academy at West Point and served as a signals intelligence analyst in the United States Army. In this role, she supported senior leaders through intelligence analysis and cross-unit coordination in high-pressure environments. Following her military service, she carried forward a strong sense of responsibility, discipline, and care for others – values that continue to shape the way she leads and serves.

At the U of A, Imon has continued her commitment to service through leadership roles on the Eller College of Management Dean's Council and with the Association for Supply Chain Management, where she works to build inclusive, people-centered communities. Professionally, she completed a supply chain management internship with Knight-Swift Transportation, leading a capstone project that was implemented by the company and resulted in measurable

operational improvements.

After graduation, Imon will begin her career as a business management associate at General Mills and plans to pursue an MBA. She hopes to lead with empathy, integrity, and purpose, using business as a platform to serve others and create meaningful, lasting impact. Outside of her academic and professional pursuits, Imon is also an endurance athlete, having completed an Ironman 70.3 and aspiring to complete a full Ironman in the future.

Nicholas Davis
FREEMAN MEDAL

Nicholas Davis is graduating with a Bachelor of Science in Business Administration in accounting. A first-generation college student from Cleveland, Tennessee, Nicholas has dedicated his time at the University of Arizona to academic excellence and service to the Tucson community.

Nicholas has made a meaningful impact through youth mentorship and nonprofit engagement, participating in service initiatives such as Feed My Starving Children, Serve Our City, and Light the Night, an event honoring individuals and families affected by blood cancers. His fundraising and community outreach has helped raise more than \$500,000 for a local nonprofit and organized events throughout Arizona.

He has also served as a volunteer with the Volunteer Income Tax Assistance program through

Student Awards

United Way of Tucson and Southern Arizona, where he uses his accounting knowledge to help low- to moderate-income families in Tucson file their tax returns free of charge.

Nicholas has demonstrated strong academic achievement during his time at the university. He is a recipient of the Dean's List with Distinction award, the McCord Scholarship, and recognition as a Deloitte Foundation Scholar, along with additional honors from the W.A. Franke Honors College and the Eller College of Management.

He is an active member of the Accounting Student Association and Beta Alpha Psi, the international honor society for financial information students and professionals. Through Beta Alpha Psi, Nicholas supports underclassmen as they navigate coursework and pursue internships with accounting firms. He also serves as an exam proctor and participates in the organization's community service initiatives. In addition, he is a student member of the Arizona Society of CPAs, where he connects with professionals across the state and gains insight into the accounting profession.

After graduation, Nicholas will complete an internship with Deloitte and begin graduate studies at Eller, where he will pursue a master's degree in accounting. He plans to become a certified public accountant and hopes to use his financial expertise to support nonprofit organizations and help maintain the financial integrity of capital markets and the economy.

Grant Palmer
PROVOST AWARD

Grant Palmer is graduating summa cum laude with honors from the College of Medicine – Tucson with a Bachelor of Science in medicine and a minor in biochemistry. Raised in rural Arizona, Grant developed an early understanding of the health care disparities facing underserved communities – an experience that shaped both his academic path and his long-term commitment to rural medicine.

Grant began his higher education at Eastern Arizona College, where he graduated with a 4.0 GPA and was named a First-Tier All-Arizona Academic Team member and Coca-Cola Gold Academic Team Scholar. After transferring to the University of Arizona, he continued his record of academic excellence, maintaining a 4.0 GPA while balancing rigorous coursework, research, leadership, and employment as a nationally registered EMT.

Throughout his time at the university, Grant has remained dedicated to serving underserved populations across Arizona. As an EMT in the Gila Valley, and previously with San Carlos Apache EMS/Fire, he has provided emergency care in rural and tribal communities where access to health care is often limited, including assisting with response efforts during the 2024 San Carlos Watch Fire. His clinical work reflects a strong commitment to

communities that face geographic and economic barriers to care.

Grant is bilingual in English and Spanish and incorporates his language skills into his service work. As a leader with Street Medicine Tucson, he supports outreach efforts for unsheltered individuals while contributing to bilingual patient education and engagement. He also serves on the executive board of the Transfer Advisory Board of Students, where he mentors fellow transfer students and advocates for their academic success within the W. A. Franke Honors College.

Alumni Achievement Award

Francisco Aguilar, JD
CLASS OF 2000 & 2004

Cisco Aguilar serves as Nevada's Secretary of State. As secretary, he is focused on modernizing, innovating and building transparency in the office.

Under Secretary Aguilar's leadership and vision, the office took on two major technology projects to modernize the state's elections and business filings. The business filing system is making business easier in Nevada, and the statewide voter registration system – implemented in just 14 months – increases security and streamlines the voter experience. Thanks to dedicated efforts to expand access to the ballot box, tribal voting turnout increased by 34% during the 2024 election.

Prior to being elected, Secretary Aguilar served 12 years as general counsel for Agassi Graf, the management company for Andre Agassi and Stefanie Graf, and the Andre Agassi Foundation for Education.

In 2020, Secretary Aguilar launched Blueprint Sports, a sports

technology startup, facilitating over \$140 million in name, image, and likeness earnings for over 25,000 NCAA student-athletes since 2021.

Secretary Aguilar graduated from the University of Arizona in 2000 with a bachelor's degree in business administration; 2004 with a master's in business administration; and 2004 with a Juris Doctor.

Passionate about education, Secretary Aguilar is the founding chairman of Cristo Rey St. Viator High School, which provides an innovative workforce development program in one of Las Vegas' most vulnerable neighborhoods.

Secretary Aguilar also served on the Nevada Athletic Commission regulating boxing and mixed martial arts for eight years, two of which he served as chairman.

Honorary Degrees

Alice Chaiten Baker
HONORARY DOCTOR OF
HUMANE LETTERS
College of Social and
Behavioral Sciences

Alice Chaiten Baker is a devoted philanthropist and community leader who has spent her life working to enrich the arts, culture, and education at the University of Arizona and in Tucson. Baker was raised in Tucson and graduated from the university, becoming the first of three generations of Wildcats.

Baker's contributions have profoundly shaped the College of Social and Behavioral Sciences, particularly the Arizona Center for Judaic Studies. Alice, alongside her husband Paul, has helped establish the center from what once was the college's Committee on Judaic Studies, with aim to help it become the state's preeminent center for the study of Jewish life and history. The university is now home to one of the most vibrant Hebrew and Judaic studies programs in the country and serves the Tucson community with public education and outreach.

The Bakers' generosity also includes the endowment of the J. Edward Wright Endowed Chair and the Edwin and Alma Lakin Holocaust, Human Rights, and Comparative Genocide Chair, as well as funding for two major conferences and a visiting professorship in Modern Israel Studies. This support has strengthened faculty leadership, expanded research and teaching

capacity, and enhanced the Arizona Center for Judaic Studies' global profile within the social sciences and humanities.

The Bakers' philanthropy and leadership extend well across campus and into the Tucson community. The Bakers supported Arizona Public Media's new building, which bears their name, and the Center for Creative Photography's Alice Chaiten Baker Gallery stands as a lasting testament to their passion for the arts – and Alice's love of photography. The Tucson Museum of Art named its Alice Chaiten Baker Center for Art Education in recognition of Baker's leadership on the museum's board.

Gabrielle Giffords
HONORARY DOCTOR OF
LETTERS
College of Architecture, Planning
and Landscape Architecture

From public office to advocacy work, Gabrielle Giffords has made a profound and lasting impact on Tucson, the state, and the nation.

A native Tucsonan, Giffords earned a degree in Latin American studies from Scripps College, where she was awarded a Fulbright Scholarship to study in Chihuahua, Mexico. She then earned a master's degree in regional planning from Cornell University before returning to Tucson to run her family's tire company.

Giffords began her political career in 2001 when she won a seat in the Arizona State House of Representatives before serving in

the Arizona Senate. In both roles, she championed education, public health, and economic development.

As a state senator, Giffords was pivotal in preserving the U of A's urban planning program, which was facing elimination. Thanks in part to Giffords' support, the program has since conferred more than 250 professional graduate degrees and grown its research profile and educational offerings in critical areas of water, climate, transportation, and affordable housing.

Giffords was elected to Arizona's 8th Congressional District in 2006. While in Congress, she was a member of the Committee on Armed Services and the Committee on Science, Space and Technology – and was the ranking member of the Subcommittee on Space and Aeronautics.

On Jan. 8, 2011, Giffords' life changed forever when a gunman opened fire at a "Congress on Your Corner" event in Tucson, killing six people and critically wounding Giffords and 12 others. She stepped down shortly thereafter to focus on her recovery – returning to public life as an advocate for gun violence prevention. Giffords then co-founded Americans for Responsible Solutions, an advocacy and research organization later renamed GIFFORDS.

In recognition of her work, Giffords was named one of Time Magazine's 100 Most Influential people in 2011. She also earned the John F. Kennedy Profile in Courage Award from the JFK Presidential Library and Museum in 2013 and was awarded the Presidential Medal of Freedom in 2022.

Honorary Degrees

F. Ronald Rayner

HONORARY DOCTOR OF SCIENCE
College of Agriculture, Life and
Environmental Sciences

A fourth-generation Arizona farmer and a first-generation college graduate, F. Ronald Rayner graduated with high distinction from the University of Arizona in 1964 with a Bachelor of Science in agricultural education. Rayner is a national leader in arid-land agriculture, especially as an innovator who helped create cropping systems designed to conserve water.

Rayner helped develop a minimum-tillage, double cropping system that is now a model for sustainable crops in arid climates – and now widely called "the Rayner Method." The system has been shown to reduce water consumption by more than 34%.

Rayner has long advocated for research and student success at the U of A. His business, A Tumbling T Ranches, has become a de facto extension and research satellite for the college, where Rayner hosts a testing ground for new technologies. Rayner has also kept decades of crop performance and water use data, which he has shared with college researchers, helping accelerate the adoption of new cropping systems in arid climates. His partnership with the college has provided land, equipment, and operational support for countless research trials, which have enriched the university's reach and land-grant mission.

Rayner has held major leadership

roles in agriculture, water policy, and civic organizations. He is a former president and chairman of the National Cotton Council of America, where, in the late 1990s, his leadership helped secure funding to stabilize the industry amid national crop losses. As chairman of the group's marketing committee, he helped position American cotton as a high-quality, responsibly produced commodity in global markets. Rayner has also served as a board member for the Central Arizona Project and later the Family Farm Alliance. Rayner also served on the Agua Fria High School board for 27 years, and remains deeply involved with youth development through Future Farmers of America.

Last year, Rayner was recognized as an Arizona Historymaker for his lifetime contributions to Arizona's agriculture and surrounding community. The distinction puts him in the company of Sandra Day O'Connor and the Navajo Code Talkers.

Scott Stuber

HONORARY DOCTOR OF FINE ARTS
College of Fine Arts

Scott Stuber is an acclaimed producer and award-winning studio executive who has spent decades redefining how films are created, distributed, and experienced. He is currently in a multi-year partnership with Amazon MGM Studios to relaunch the historic United Artists and to finance and release movies from his new production company. Recent projects from Stuber include Guillermo del Toro's

"Frankenstein" for Netflix, which won three Academy Awards®.

From 2017 to 2024, Stuber served as chairman of Netflix Films. Credited with transforming Netflix's expansive film slate, he oversaw the acquisition, development, or production of Netflix's biggest and most beloved movies, including titles like Alfonso Cuarón's Academy Award®-winning "Roma," Martin Scorsese's "The Irishman," and Jane Campion's "The Power of the Dog."

Under Stuber's leadership, Netflix was the most nominated studio at the Academy Awards® for three consecutive years (2020, 2021, 2022), solidifying its reputation as a home for visionary filmmakers whose artistry would be supported rather than constrained by traditional commercial expectations.

Prior to his time at Netflix, Stuber founded and ran Bluegrass Films, which produced such hits as "Ted," "Central Intelligence," and "Safe House," among many others.

In 2024, it was announced that Stuber would join Amazon MGM Studios to relaunch the historic United Artists brand – the company instrumental in producing such films as "Apocalypse Now," "12 Angry Men," and "The Good, the Bad and the Ugly."

A proud University of Arizona alumnus, Stuber studied in the then-media arts department – now part of the School of Theatre, Film and Television – and received the College of Fine Arts Professional Achievement Award in 2010 for his rising influence.

Throughout his career, Stuber has demonstrated a steadfast commitment to producing films of cultural significance meant not only to entertain, but to endure. His projects have brought screen media to audiences in ways that inspire, inform, and provoke reflection, helping shape the evolving cultural landscape.

Graduation with Honors

The University of Arizona W.A. Franke Honors College offers admission to a highly selective group of academically distinguished students. Students who graduate with honors are awarded a gold medallion to wear at the Commencement ceremony. Graduation with honors signifies that students have satisfied 18-30 hours of honors academic work, earned a cumulative GPA of 3.5 or greater, and completed a senior honors thesis, design project or capstone experience. The honors academic experience is more exploratory, experimental and open-ended than the usual classroom experiences. Honors academic work enables students to engage the material in more depth, to actively participate in scholarly and creative processes, and to personalize their learning through imaginative, critical and applied experiences.

Special opportunities provided to honors students include: unique classes, independent study projects, small group discussions, topic-centered colloquia, informal interaction between faculty and students outside the classroom, funding for undergraduate research, one-on-one preparation for graduate and professional school, and advising for students interested in nationally competitive scholarships and fellowships. Graduates of the University of Arizona W.A. Franke Honors College are highly successful. The majority of students graduating with honors go on to professional or graduate schools; the rest immediately enter the workforce in fields such as architecture, engineering and teaching.
